

## School on Surface Analytical Techniques

11-14 March 2008

Max Planck Institute of Colloids and Interfaces, Wissenschaftspark Golm  
Am Mühlenberg 1, 14476 Potsdam-Golm

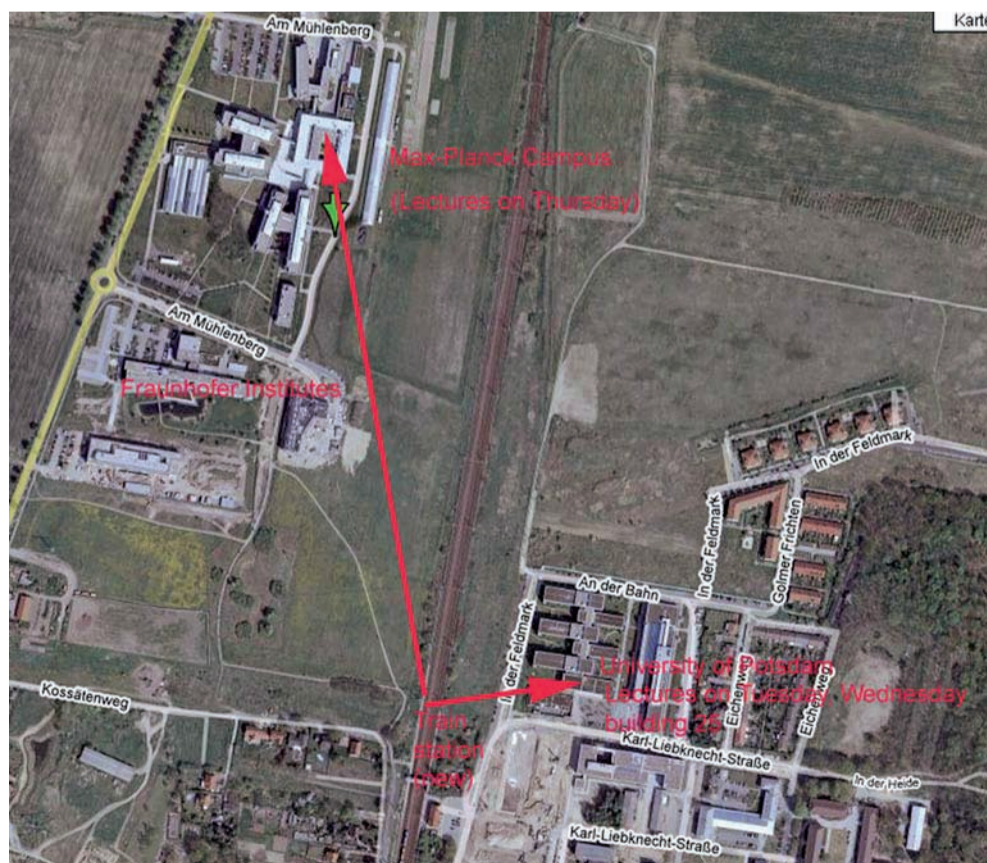

### Last Minute Update COST D43 Workshop

Our workshop was well received. Due to space constraints at the Max-Planck Institute of Colloids and Interfaces we decided to relocate the workshop on Tuesday, Wednesday and Friday to the Chemistry Lecture Hall of the University of Potsdam. On Thursday the talks are at the Max-Planck Institute of Colloids and Interfaces as originally announced and a lab tour is offered as well.

Both locations are close to each other at the Research Campus Golm next to the new Golm train station. The Research Campus Golm is divided by the railway tracks. One side hosts three Max-Planck Institutes and two Fraunhofer Institutes, the other the University of Potsdam. Please follow the conference signs to the University Campus.

Lectures are given in the the Lecture Hall F001, Building 25 in the Chemistry Department. The exercises are discussed in small workgroups in two adjacent seminar rooms (B001 and F015).

We are looking forward to seeing you soon!  
The Organizers

### Travel Informations:

by bus: 606, 605 or X5 from Potsdam central train station "Potsdam Hbf"

by train: RB 21 or RB 20 from Potsdam central train station "Potsdam Hbf"

by car: e.g. via A10 gateway Potsdam-Nord or Leest -direction Golm.

Attention for navigations systems:  
K.-Liebknecht-Str. in 14476 Potsdam-Golm,  
(not: /14482 Potsdam-Babelsberg!)
